FUN FACTS ABOUT KANGAROOS

Baby kangaroos
They are about the size of a jellybean at first! After they're born, they climb up into a pouch to grow for another six months.

They can't walk or hop backwards.
Because of their long feet and large tail, kangaroos can't walk or hop backwards. They can walk or hop only straight ahead.

T = ✓ / F = ✗

- Baby kangaroo is very little at first.
- Baby kangaroo lives in a pouch for 1 month.
- Kangaroos can walk and hop backwards.
- Red kangaroo is three meters tall.
- The biggest kangaroos can jump 9 meters.
